EDUCATION

Polytechnic University of the Philippines

Bachelor of Science in Information Technology

Relevant Coursework: Computer Programming, Data Structures and Algorithms, Object-Oriented Programming

Sta. Mesa, Manila

2023 – Present

WORK EXPERIENCE

Full Stack Developer

January 2026 – Present

Arterion Philippines

- Designed, developed, and maintained Orion, Arterion's internal operations and task management platform, leveraging the PERN stack (PostgreSQL, Express.js, React, Node.js).
- Delivered full-stack solutions, including database architecture, RESTful API development, and responsive user interfaces, with an emphasis on scalability and code maintainability.
- Built and enhanced internal tools and workflows to improve operational efficiency and minimize manual processes.
- Collaborated closely with cross-functional stakeholders to translate business requirements into production-ready features and continuous product improvements.

Full Stack Web Developer Intern

January 2026 – March 2026

Incub8 Space

- Diagnosed and resolved critical issues in the Virtual Office Registration System using Java and Spring Boot, improving stability across authentication, validation, and registration workflows.
- Fixed backend and frontend defects affecting user onboarding, ensuring accurate data handling and a smoother end-to-end registration experience.
- Strengthened system reliability by implementing secure error handling, validation checks, and database-integrated fixes for business registration processes.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C, Python, PHP, HTML, CSS

Frameworks and Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, Supabase, MongoDB

Tools and Platforms: GitHub, Git, Cisco Packet Tracer, Figma, Adobe Photoshop, Adobe Lightroom

PROJECTS

COSMOS 2026 (Web App)

Next.js, TypeScript, Tailwind

- Developed a centralized event platform to showcase event details, updates, and registration, providing a seamless user experience.

SalinTinig (Web App)

HTML, CSS, JavaScript, PHP, MySQL

- Built a CRUD-based web application for a Web Development course to support students through clear and accessible text presentation.

Quilana-V2: LAN-Based Examination System (Web App)

HTML, CSS, JavaScript, PHP, MySQL

- Enhanced a LAN-based quiz system by implementing new features and improving automated scoring and result recording.

Flapetite (Game App)

Python, Pygame

- Developed core gameplay features for a food-themed arcade game with multiple worlds and dynamic obstacles to enhance player engagement.

Pahingalay Hotel Booking System (Web App)

HTML, CSS, JavaScript, Python Flask, MySQL, Google Maps API

- Created a booking system with CRUD functionality to manage guests, reservations, and room availability, integrating location-based services.
